Java Full Development

Work Experience

Cognify technology

full stack developer intern

Jan 2026 – Feb 2026

During my internship at cognifyz, I worked as a Full Stack Java Developer Intern, contributing to the development and maintenance of web-based applications. I gained hands-on experience in both front-end and back-end technologies.

- Developed and maintained web applications using Java, Spring Boot, and Hibernate.
- Designed and implemented RESTful APIs for backend services.
- Built responsive user interfaces using HTML, CSS, JavaScript, and React.

Projects

Online Examination System

Developed a web-based Online Examination System that allows administrators to create exams, manage questions, and evaluate results, while enabling students to register, log in, and take exams securely.

Sep 2024 – Nov 2024

- User Authentication & Role Management
- Secure login/registration for Admin and Students
- Role-based access control
- Create, update, and delete exams
- Add multiple-choice questions with timer functionality
- Auto-submit on time completion

Query Management System

Developed a web-based Query Management System to process of submitting, tracking, and resolving user queries within an organization. The system allows users to raise queries and enables administrators or support staff to respond, update status.

Jan 2025 – Mar 2025

- Secure login for users and admins
- Role-based dashboard access
- Users can submit queries with categories and descriptions
- Real-time status tracking.
- Automatically assign ticket to support staff and at time maximum 2 ticket assign, not more than that.
